

ASTRONET

Astronomy Coordination for Europe

ASTRONET is a network of European funding organisations and infrastructures, working with the community, to provide a strategic planning mechanism and coordination mechanism for all of European astronomy.

Astronet includes the whole astronomical domain: the Solar System to the limits of the observable Universe and from radioastronomy to gamma-rays, theory and computing, virtual observatory and laboratory astrophysics, outreach and training of vital human resources.

Astronet will:

- refresh and implement the Science Vision and Infrastructure Roadmaps
- enhance communication and coordination between existing and planned infrastructures within Europe – to include ESA and ESO
- liaise between Astronet and other European science strategy providers; including the EU and ESFRI.
